ABOUT THE COMPANY

Arlight is a manufacturer of lighting equipment with over 25 years of experience. It is one of the top-10 largest manufacturers of LED equipment in Russia. The product range includes more than 10,000 premium SKUs: LED strips and LEDs, lamps, commercial and landscape lighting, household and industrial lighting, aluminium profiles and magnetic systems, power supplies, intelligent lighting control systems and decorative lighting.

Today we have 250 official dealers throughout Russia, from Kaliningrad to Yuzhno-Sakhalinsk. Our showrooms are located in Moscow, St. Petersburg, Nizhny Novgorod, Surgut, Perm, Rostov-on-Don, Krasnodar and Novorossiysk. Over 95% of our products are always available in our warehouse complexes in Moscow, which allows us to bring you your order on the next day after you place it.

Arlight has different contracts with architects and design organizations, system integrators, and installers. When working with us, architects receive full technical documentation, expert advice, assistance in the selection of equipment and assessment of the lighting project by lighting engineers. Personal managers provide all-around support at all stages: from design to project implementation.

We offer free webinars, workshops and presentations on the entire range

of our products. Architects have access to IES and 3D files, as well as the Dialux plugin.

With Arlight products, it is possible to implement projects of any scale: from interior lighting of an apartment to a more sophisticated lighting of business centers; from landscape lighting of country houses to architectural lighting of public facilities.

Arlight possesses a robust production base: its own factory for the production of LEDs, LED strips and profile lighting is located in Brest, while the aluminium profile plant — in Poland. LED lighting, decorative lighting, flexible neon, power supplies and lighting control equipment are manufactured in China.

We have our own photometric laboratory in Moscow that offers a full range of services for research and testing of lighting products.

No matter which segment your project belongs to, with Arlight equipment you'll implement it at a professional level.

We provide an extended warranty for all equipment (up to 7 years for some models), as well as warranty and post-warranty service.

INDOOR LUMINAIRES

MAGNETIC SYSTEM

Each system features a variety of tracks and lighting to create custom lighting systems for different interiors. Excellent light quality with a high color rendering index (CRI>90). Quick and secure mounting of lighting in the track using magnets. Possibility to freely move the lighting along the track and place lightning accents. The safety voltage is either 24 or 48 V.

MAG-45

White or black tracks with a width of 45 mm. Surface, pendant or niche mounted. Possibility of dimming.

MAG-25

Compact track system with 24 mm track width. Surface, pendant or recessed mounted. Unique electrical connectors make installation easy and convenient.

MAG-ORIENT

Small and functional magnetic system with a track width of 26 mm. Tracks can be cut into fragments of any length. Possibility to control lighting via DALI protocol.

MAG-FLEX

Flexible lighting for magnetic tracks with a width of 32 mm. 3D glow, different installation options and incredible light compositions.

MOSCOW DESIGN MUSEUM

LIGHTING TRACK SYSTEM

2-wire (2TR) and 4-wire (4TR) lighting track systems for lighting private interiors, shopping and office centers, supermarkets and commercial facilities. Lighting can be freely moved around the track, easily changing the lighting configuration. Possibility of DALI-dimming and setting up groups of lightings for different switching scenarios. The low light ripple factor guarantees stable light quality without flicker.

Additional series

GERA and ZEUS TRUFCOLOR

Lightings with high color rendering index (CRI>98). For premises requiring high-quality light: museums, exhibition and art galleries, showrooms and trading floors, children's playrooms, etc.

CRI>98

FOOD

Lightings with special glow colors for highlighting various products in showcases. Improve the appearance of products and encourage purchase, increasing sales growth.

LUMINAIRES COLLECTIONS

The catalog contains collections of luminaires with different types of housings and mounting options, united by a common style and design.

Recessed, surface, suspension mounted or track system lightings within the same collection allow you to organize different types of lighting in the same style.

Simple minimalism or luxurious classics. Soft rounded lines or clear geometry.

Each collection is inspired by different design trends, combining bright images and impeccable shapes, modern functionality and different configurations.

All planes of light in one catalog to give the interior a unique style and make the lighting unique and comfortable.

LIGHTING DESIGN

DECORATIVE LIGHTING

DOWNLIGHTS

A variety of lightings to create basic, decorative and directional lighting.

The design of the lightings allows them to be used in various interiors and can be easily combined with each other, creating multifunctional lighting.

Most models have a special mechanism for convenient adjustment of the angle of inclination of the light module.

Provide uniform and bright illumination without flickering and dazzling LED dots.

INTERIOR

A good choice for decoration of offices, trading floors, and residential premises in high-tech style.

Luminaires have a high luminous flux.

The main advantage of cardan luminaires is the possibility to direct the light beam in the right direction, which, together with a narrow beam angle, allows you to concentrate light on details.

SLIM PANELS FOR SUSPENDED CEILING

Great solution for recessing into the ceilings Armstrong and Grilyato ceilings.

The panels are designed for offices, shopping malls, classrooms, hospitals and other premises, where you need to quickly install high-quality basic lighting.

Possibility to create automatic color temperature control throughout a day (HCL).

Control the brightness and color of the glow using wall panels or a mobile phone.

Miniature furniture luminaires can be used both functionally (illuminating clothes in an open closet, working area in the kitchen, shelves with keys) and as decorative elements (emphasis on interior decor items). Models with a wide and narrow beam angle, static and rotary, allowing you to direct a narrow beam of light in the right direction.

OUTDOOR LUMINAIRES

FACADE LUMINAIRES

Bright, interesting and functional outdoor lightings.

FLAT/VASE

Surface mounted wall lighting for background lighting and decorative indoor lighting. Soft glow, attractive design, compact size and minimal power consumption.

TUB

Original design and double-sided lighting up and down. For decorative highlighting of country houses' facades, adjacent territory and small architectural forms.

VARIO

Lighting with variable illumination angle of 0–80° to highlight walls. Double-sided lighting up and down and independent adjustment of the beam angle for each direction.

DELTA

Universal form. Screen made of impact-resistant polycarbonate and waterproof housing.

IN-GROUND LUMINAIRES

They look spectacular for highlighting pedestrian paths in parks or as an element of light navigation in office or shopping centers.

GROUND

Compact size and the possibility to adjust the beam angle in the range of 15–50°.

LUMILINE

Linear lights for installation into soil or concrete with the possibility of forming continuous “lines of light”. Withstand static load up to 2000 kg and can be used in pedestrian areas with little traffic.

A well-thought-out design made of high-quality materials will ensure long and reliable operation of the lights.

LINE

Regular lights for installation on horizontal or vertical surfaces.

Asymmetric light distribution for highlighting floors, sidewalks, walls, facades and other indoor and outdoor surfaces.

ARLIGHT & K — LED PLANT

Arlight & K is a plant with the most modern technologies and a high level of automation.

PLANT CAPABILITIES

- ▶ Production of any batches of LED products.
- ▶ Full production cycle.
- ▶ Plant area 4000 m².
- ▶ Professional team of 198 people.
- ▶ Automated industrial equipment.
- ▶ Multi-stage quality control system.
- ▶ Testing, including environmental.
- ▶ "Clean room" available for planting crystals in the housing, unwelding with gold thread and pouring with phosphor.

Warranty
3 to 5 years

LED strip life span
is more than 50 000 hours
thanks to pure gold
conductor Au 99.99%

The highest light
quality — color rendering
accuracy, without color
distortion

3M adhesive tape holds
LED strip securely
throughout whole life
span

Guarantee
of uniformity of color
along the entire length
of LED strip

A complete range of LED strips of different power, with a PCB width ranging from 3.5 to 85 mm: single-color, MIX, RGB, RGBW, RGB-MIX, stabilized strips, strips with different LED pitches, waterproof and heat-resistant strips.

SPI "RUNNING LIGHTS" | DMX CONTROL

COLOR MANAGEMENT

LED strips of the new generation of this series are used to create multicolor lighting effects of varying complexity: from the simplest «running lights» effect to the playback of dynamic color installations on the multimedia screens controlled via standard protocol DMX512 or standard interface SPI.

Application

- ▶ Decorating theatrical shows, discos, restaurants, storefronts and the creation of advertising signs.
- ▶ For media facades.

AUTO. The LED strip has a microcontroller that has built-in dynamic effects that switch automatically, which allows you to use the LED strip without an external controller in automatic mode.

RAM. The built-in driver has a «broken» pixel bypass mode. The failure of one LED does not affect the signal transmission further along the LED strip and does not break the overall pattern of the dynamic effect.

LED STRIPS SPECIAL PCB

LED strip with a curly board in a shape of a «wave»

The special wave shape of the PCB allows you to bend the LED strip on the plane.

- ▶ Highlighting of curved shapes.
- ▶ Highlighting of text, showcases and niches.

LED strips with side view

The special positioning of the LEDs provides one-way direction of the light flux parallel to the PCB.

- ▶ For installation in slim niches.
- ▶ Highlighting of glass shelves, stairs, steps.

SERIES A160

LED	2835
Quantity per meter (pcs/m)	160
Cutting length (mm)	50 (8 LEDs)
PCB width (mm)	15
Power (W/m)	19.2
Luminous flux (lm)	2900

SERIES S120

LED	3014
Quantity per meter (pcs/m)	120
Cutting length (mm)	50 (6 LEDs)
PCB width (mm)	8
Power (W/m)	9.6
Luminous flux (lm)	960

OTHER SERIES A120

LED STRIPS SPECIAL GLOW

SHOP STRIP

Specially developed glow spectra for fruits, vegetables, fish and meat allow products to look more attractive to customers.

- ▶ Highlighting of food displays in stores, malls and showrooms.

SERIES A112

LED	2835
Quantity per meter (pcs/m)	112
Cutting length (mm)	71.43 (8 LEDs)
PCB width (mm)	10
Power (W/m)	18.4
Luminous flux (lm)	1700

FITO STRIP

LED strip with a universal spectrum for growth of vegetable crops and ornamental plants at all stages of vegetation.

- ▶ Designed for small vertical trusses, as well as highlighting of indoor plants.

SERIES A144

LED	2835
Quantity per meter (pcs/m)	144
Cutting length (mm)	62.5 (9 LEDs, ratio: 6 white and 3 red)
PCB width (mm)	10
Power (W/m)	14
Luminous flux (lm)	1900

LED STRIPS SAUNA

Waterproof LED strip in a durable silicone sheath has a reinforced design. Creates frosted diffused glow.

Application

- ▶ Designed for decorative lighting and highlighting of saunas and bathrooms.
- ▶ Suitable for outdoor use and advertising design.

IP68

-30... +100 °C

SERIES A180

LED	2835
Quantity per meter (pcs/m)	180
Cutting length (mm)	33.3 (6 LEDs)
PCB width (mm)	13
Power (W/m)	14.4
Luminous flux (lm)	1000

SERIES H120

LED	4040
Quantity per meter (pcs/m)	120
Cutting length (mm)	50 (6 LEDs)
PCB width (mm)	13
Power (W/m)	14.4
Luminous flux (lm)	350

LED STRIPS POOL

The waterproof LED strip has an IP68 rating and is suitable for use underwater at a depth of under 2 meters. It has a high resistance to the corrosive environment.

Application

- ▶ Lighting of swimming pools, decorative ponds and fountains.
- ▶ Decorative lighting and highlighting of saunas and athrooms.
- ▶ Outdoor and advertising design.

SERIES A120

LED	2835
Quantity per meter (pcs/m)	120
Cutting length (mm)	25 (3 LEDs)
PCB width (mm)	10.5
Power (W/m)	16.8
Luminous flux (lm)	1330

SERIES B60

LED	5060
Quantity per meter (pcs/m)	60
Cutting length (mm)	50 (3 LEDs)
PCB width (mm)	12.5
Power (W/m)	14.4
Luminous flux (lm)	1100

LED STRIPS

ONIX STONE ILLUMINATION NET

Specialized LED strips are designed for exclusive, extraordinary and creative projects of basic and decorative lighting. An elegant engineering solution to the complex problem of highlighting stone or illuminated ceilings. The LED strips are gathered in groups to form a continuous net with a width of 410 mm and a total length of 3 m. Possibility of highlighting a large area without complicated connections.

CRI>85

SERIES A640

Application

- ▶ Indoor lighting.
- ▶ Decorative floor and stair lighting.
- ▶ Advertising highlighting (showcases, lightboxes, text).

WORLD CLASS, MOSCOW

ALUMINIUM PROFILES

APPLICATION

Cooling. Aluminium effectively dissipates heat, increasing the service life of LED strips.

LED strip protection. The diffusers used with the profile reduce the effect of LED dots and protect the LED strip from the impact of the environment.

Advantages of Arlight profiles

- ▶ Variety of products.
- ▶ High-quality anodizing and painting
- ▶ Exact adherence to Dimensions.
- ▶ High-quality material diffusers.
- ▶ Large number of accessories facilitating installation.

Aesthetic appearance and customized solutions.

The profile gives LED lighting completed aesthetic appearance and allows to avoid monotonous prefabricated solutions.

Shape

Application

- ▶ Organization of the basic lighting.
- ▶ Creating "lines of light".
- ▶ Creating linear lighting and light with various shapes.

SURFACE MOUNTED

Series **ALU | SL-KANT | BOX | ARH-WIDE | ALM-FLAT**

Models with additional design features:

- ▶ with space for power supply;
- ▶ low height;
- ▶ angular models;
- ▶ for the lighting with a focused beam 30°.

RECESSED

Series **PLS-LOCK | PLS | KLUS-POWER | ALU-WIDE | SL-LINIA | SL-COMFORT | ARH-WIDE | ARH-POWER | ALM | ALU-POWER | S2-LINIA | KLUS-LOCK | ARH-LINE**

Models with additional design options available:

- ▶ with a wide beam angle;
- ▶ with space for power supply;
- ▶ side lighting profiles;
- ▶ hidden installation.

PENDANT

Series **PLS-LOCK | SL-ROUND | SL-MOONRING | ARH-LINE | ARH-WIDE | ARH-POWER**

Models with additional design features are available:

- ▶ radial;
- ▶ round cross section;
- ▶ with space for power supply;
- ▶ with double-sided lighting.

COMBINED

Series **PLS-LOCK | KLUS-P45 | KLUS-POWER | MULTI | KLUS-LINE | SL-LINE | SL-COMFORT | ARH-POWER | ARH-WIDE | S2-LINE | SL-ARC | ARH-LINE**

Models with additional design features are available:

- ▶ with wide beam angle;
- ▶ with space for power supply;
- ▶ consist of two components for easy maintenance;
- ▶ hidden installation;
- ▶ with double-sided lightning.

* Some models.
** Painting in any RAL color according to the customer's order

DECORATIVE LIGHTING

Application

To create additional (contour) interior lighting:
 ▶ accent, contour glow;

- ▶ creating fine light lines;
- ▶ creating decorative light elements.

SURFACE MOUNTED

Series **SL-MINI** | **SL-SLIM** | **SL-KANT** | **PIK** | **MIC** | **PDS** | **TM** | **TS** | **PHS** | **ARH-WIDE** | **PHS** | **SILER** | **LOCK-FM** | **ARH-LINE** | **ARH-MINI** | **ARH-KANT** | **ARH-BENT** | **ALM-W60**

Models with additional design features:

- ▶ angular;
- ▶ low height;
- ▶ with hidden light source;
- ▶ with adjustable beam angle;
- ▶ with rounded flanges;
- ▶ wide aluminium profile for multiple LED strips.

RECESSED

Series **MIC** | **PIK** | **SL-MINI** | **SL-SLIM** | **SL-BEVEL** | **PLS-LOCK** | **SL-COMFORT** | **ALU-WIDE** | **ALU** | **ARH-NANOLINE** | **TK-F** | **HR** | **ARH-DECORE**

Models with additional design options available:

- ▶ without flanges;
- ▶ with flanges;
- ▶ with hidden flanges;
- ▶ angular;
- ▶ with hidden light source.

PENDANT

Series **ARH-LINE**

Models with additional design options available:

- ▶ round;
- ▶ with conductive end caps.

COMBINED

Series **PIK** | **PDS** | **ALU** | **SL-LINE** | **ARH-BENT** | **ARH-ROUND** | **WPH-FLEX** | **WPH-FLOOR** | **ALM-FLAT-R**

Models with additional design options available:

- ▶ Possibility of hidden installation, with a hidden light source;
- ▶ bendable profile.

* Some models.

** Painting in any RAL color according to the customer's order.

ALUMINIUM PROFILES SPECIAL LIGHTING

Application

For special needs:

- ▶ highlighting of ceilings and niches;
- ▶ walls, shelves and glass;

- ▶ floors, baseboards and sidewalks;
- ▶ steps and handrails;
- ▶ complex geometric objects;
- ▶ for drywall, with mounting adhesive.

FOR STRETCH CEILINGS

Series **FOLED | STRETCH**

Creating light lines around the perimeter and in the center of stretch ceiling.

FOR GLASS AND SHELVES

Series **EDGE | GLASS8 | EX | SHELF | ALM**

FOR SIDEWALKS AND FLOORS

SERIES **HR**

FOR CEILINGS AND NICHES

Series **POLI | PAK | ARH-CEIL | ARH-V-DUAL**

Uniform lighting even for niches that are difficult to access.

LIGHT CONTROL

CUTTING EDGE SYSTEMS

Modern lighting design and lighting design systems are in constant flux and development, therefore it is almost impossible to imagine them without multifunctional equipment for light control.

Lighting becomes more functional, allows you to easily transform interiors and arrange lightning accents, as well as to program light scenes, dynamic effects and implement complex building automation systems.

Whereas recently it was common to have only a few luminaires in a room, the latest trends dictate the use of multi-level lighting with adjustable brightness and color temperature of light sources.

LIGHT CONTROL SMART SERIES

The devices of SMART series are used to control LED strips and the main types of lightings (incandescent light bulbs, halogen lamps, dimmable LED lamps, dimmable fluorescent lamps, etc.), SPI (addressable) strips, modules, projectors. Allow you to control brightness, color temperature, color, switch on/off.

Features

- ▶ Affordable equipment in the medium price category.
- ▶ Modern and ergonomic design.
- ▶ Radio control (range up to 100 m).
- ▶ Synchronization of controllers: serial signal transmission to another device, total distance of up to 150 m.
- ▶ Possibility of control from a smartphone.

Application

- ▶ Small private and commercial properties (apartments, houses, offices).
- ▶ Facilities where the customer does not require implementing a programmable and scripted control scheme.

LIGHT CONTROL

TRIAC SERIES

TRIAC series is used to control lamps (incandescent, halogen, fluorescent) and LED lights that support TRIAC dimming, as well as LED strips and 230 V flexible neon. Functions: brightness control, turn on/off.

Features

- ▶ Easy mounting.
- ▶ High reliability.
- ▶ Possibility of wireless control.
- ▶ Possibility of integrating equipment into a fully-repaired room.
- ▶ Smooth increase in the control voltage due to the trailing edge cutoff.
- ▶ Minimum level of electromagnetic interference.

Application

- ▶ Small private and commercial properties (apartments, houses, offices).
- ▶ Possible integration with converters into large projects as the final branches of the scheme.

SERIES DMX512

DMX512 series devices are designed to control LED strips and lamps (incandescent, halogen, dimmable LED lamps and CFLs, etc.), SPI (addressable) strips, modules, projectors. High-speed color-dynamic system: control of lighting, dynamic light and decorative illumination.

Features

- ▶ Implementation of color-dynamic light control.
- ▶ Possibility of Offline or online control (ArtNet software).
- ▶ Simple and well-documented implementation.
- ▶ Open protocol, wide range of models.
- ▶ High reliability, stability and compatibility of equipment.
- ▶ The protocol supports up to 512 device addresses on a single cable up to 500 m in length.

Application

- ▶ Concert halls, nightclubs, restaurants, theaters.
- ▶ Private and commercial facilities (apartments, houses, offices).
- ▶ Architectural highlighting.

Radio transmitters / Radio receivers.
DMX512 amplifiers.
DMX512 splitters: up to **8 output channels**.

CONVERTERS

Converts DMX to SPI/ 0-10 V.
Converts ArtNet (Ethernet) to DMX.

DMX ADDRESS EDITORS

Maximum quantity
DMX addresses **3072**.

The devices of this series are designed to control color dynamic lighting: pixel (addressable) strips and modules:

- ▶ Pixel media facades.

- ▶ Light installations.
- ▶ Light dynamic shows.
- ▶ Light tracks, lines, scoreboards with the "running lights" effect.

Features

- ▶ Possibility to create systems with a number of pixels from 1 to 400,000.
- ▶ Simple management interface.
- ▶ Possibility to use the standard built-in programs, as well as create your own dynamic effects, texts, drawings and videos.
- ▶ Possibility to connect up to 1024 RGB pixels per line*.
- ▶ SPI and DMX protocol capability.

Application

- ▶ Architectural highlighting.
- ▶ Sports and cultural facilities.
- ▶ Private and commercial facilities (apartments, houses, offices).
- ▶ Advertising media.

DECODERS

Conversion of DMX to SPI.

COMPATIBILITY TABLE FOR CONTROLLING CHIPS
arlight.ru

* Pixel is an individually controlled LED or a group of several LEDs. In addition to LEDs, the pixel contains a control chip that managed by a commands from an external controller and controls the pixel's LEDs. There are constructions where pixels are located at the LED strip or LED modules itself and even at the LED square modules.

LIGHT CONTROL INTELLIGENT ARLIGHT

SMART LIGHT TERRITORY

TM INTELLIGENT ARLIGHT is an integrated solution powered by wired and wireless devices of various control systems ensuring high reliability and ease of use. The brand combines the "smart lighting" developments and the recent advancements of global lighting control protocols.

INTELLIGENT ARLIGHT presents a series of devices optimized for various design tasks. The solution allows implementing free programming logic and creating automation systems of varying complexity. The systems are suitable for all applications: home, office, commercial and professional.

DALI system is used to control the lighting.

To create a full-fledged automation, including the control of light, climate, curtains and other equipment, and a developed scenario component, KNX is used. Our company is a full partner of the International KNX Association in Brussels.

To create wireless systems, our company offers the TY (TUYA) series. The system comes with a mobile app for easy management and remote access.

Use the limitless features of INTELLIGENT ARLIGHT and create your own territory of intelligent lighting.

LIGHTING
DESIGN

DECORATIVE
LIGHTING

TUYA devices are designed to control almost any light source. Allow you to control the brightness, color temperature, color, on/off lighting.

"The Internet of Things" (IoT) is an emerging trend, integrating "smart" outlets, lighting, various sensors and even household appliances such as air conditioners, washing machines, heaters and toasters into one network. TUYA series allows you to integrate your lighting system into the Internet of Things (IoT) on the Tuya platform in a way that requires no special skills.

Features

For lighting designers and facility owners

- ▶ Friendly and intuitive lighting system with the option of both local and remote control.
- ▶ No special skills are required for mounting and installing the equipment.
- ▶ Easily create "smart" zones based on temperature, light, geographical location, and many other factors.
- ▶ It is possible to manage several users together.
- ▶ Wireless control through Wi-Fi with Internet access, Bluetooth (connection at any stage of repair, no need to lay control wires/types).
- ▶ Smartphone/tablet control via the TUYA mobile app and/or the TUYA control panel.
- ▶ Possibility to control with Yandex.Alice voice assistant, Amazon Echo and Google Assistant.
- ▶ No subscription fees.
- ▶ Channel protection for remote access.
- ▶ The devices can be controlled separately, individually and/or in groups.

For electricians, installers and system integrators

- ▶ You don't need a central controller.
- ▶ Easily programmable scenarios.
- ▶ Possibility to use timers and logic functions.
- ▶ Easily scale-up to a complete "smart home".
- ▶ Rights and permissions can be configured.
- ▶ TUYA series is fully compatible with the Tuya Internet of Things platform.
- ▶ Wi-Fi devices require a peer-to-peer Wi-Fi network with Internet access (for remote access and operation of scripts and automation).
- ▶ For BLE devices with no external access there are no additional conditions of use, the Mesh-net between them is automatical. If you plan to use remote access and work scenarios and automation, you will need a Wi-Fi-BLE gateway.

TUYA app

Features

- ▶ Control of all kinds of TUYA devices in one app (available in the respective Google Play and iOS stores).
- ▶ Management of "smart" outlets, switches, lights, dimmers and controllers, IP-cameras, home appliances from anywhere in the world.
- ▶ Control of each device individually, in groups of several devices.
- ▶ Easily create "smart" zones based on temperature, light, geographic location, and many other factors.
- ▶ Interaction of several "smart" devices by scenario.
- ▶ Compatible with Yandex.Alice voice control (some devices), Amazon Echo, Google Assistant and IFTTT automation service.
- ▶ Multiple device management.

Yandex.Alice voice control

Application

Premises of any size: from one room to large residential or commercial premises: stores, factories, offices, parking lots, etc.

CONTROL DEVICES

CONSOLES

Control systems	Push-button switches Rotary
Dimensions	Standard Miniature

LIGHTING DESIGN

DECORATIVE LIGHTING

DALI devices allow you to control almost any light source:

- ▶ Tuning on/off, adjusting brightness, color temperature, controlling RGB light sources in any combination, creating automatic HCL systems with variable color temperatures.
- ▶ Recall and save light zones, group or address control, assign and change device addresses, diagnose faults, query device status.

Features

For owners, tenants and operating organizations

- ▶ Creating a friendly and intuitive lighting system with the option of both local and remote control.
- ▶ Possibility of centralized control of lighting.
- ▶ Meeting the high standards of office buildings A, A+, A1, A2.
- ▶ Reduced maintenance costs and labor.
- ▶ Possibility to organize biodynamic lighting, which has a positive effect on employee performance (HCL).

For electricians, installers and system integrators

- ▶ Low-voltage control line with the option of laying the two signal wires together with the power wires.
- ▶ No special control cables are required.
- ▶ Free topology.
- ▶ Easy programming of control scenarios and lighting system settings.

- ▶ Well-documented protocol.
- ▶ No attachment to one manufacturer: a wide range of sensors, panels, dimmers, gateways, etc.
- ▶ Low-cost solutions.
- ▶ Easy integration into almost all top-level systems.

For lighting designers

- ▶ A wide variety of compatible devices from different manufacturers.
- ▶ Possibility of smooth dimming with maximum comfort for human eyes (logarithmic method).
- ▶ Possibility to adjust multicolor light sources.
- ▶ Easy setup and configuration changes, if necessary.
- ▶ Possibility to organize biodynamic lighting. Automatic change of color temperature of light sources depending on the time of day (HCL).

LIGHT CONTROL DALI SERIES

Application

- ▶ Automation of rooms and buildings with an option of local or remote control, monitoring the status of each device.
- ▶ Architectural, industrial, home ("smart home") lighting, connection to the BMS system.

LIGHTING DESIGN

DECORATIVE LIGHTING

KNX series equipment is used to control lighting, ventilation, multimedia, water treatment systems, security, climate control and other engineering systems.

Features

For owners, tenants and operating organizations

- ▶ Creating a multifunctional autonomous control system of engineering systems of the facility with the option of both local and remote control.
- ▶ Possibility to centralize management of engineering systems of the facility.
- ▶ Improving the quality of life and use of the facility.
- ▶ Reduced maintenance costs and labor.
- ▶ Reliability due to wired type of communication and digital equipment.
- ▶ The warranty for all the devices is 3 years.

For electricians, installers and system integrators

- ▶ Free topology.
- ▶ Easy programming of control scenarios and settings.
- ▶ Well-documented protocol.

- ▶ No attachment to one manufacturer, a wide range of equipment.
- ▶ Easy integration into almost all top-level systems.
- ▶ Setup is performed from a single manufacturer's ETS interface.
- ▶ The warranty for all the devices is 3 years.
- ▶ ISO/IEC 14543 protocol.
- ▶ Arlight is a partner of the KNX Association.

For lighting designers

- ▶ A wide range of compatible devices from different manufacturers.
- ▶ Easy to set up and reconfigure as needed.
- ▶ A variety of design solutions for control (control panels, buttons, etc.).
- ▶ High commercial viability of using KNX systems in projects.
- ▶ Possibility to combine controls of several engineering systems on one control device.

Application

From private apartments and homeowners to huge commercial facilities:

- ▶ stores,
- ▶ production facilities,
- ▶ parking lots,
- ▶ shopping and office centers, etc.

SELECTION OF POWER SUPPLY

1 Consider the of the installation site and the size of the power supply

- ▶ Allow clearance around the power supply or use forced ventilation. Power supplies encapsulated in air convection housing (HTS/ARS/JTS series) require more free space (at least 20 cm).
- ▶ Do not install a waterproof power supply where water accumulates.

2 Consider the type of room for installation

- ▶ The rooms are non-waterproof power supplies without a fan. When dimming, waterproof metal blocks. Optimal power 100–200 W.
- ▶ Offices, shopping centers: the use of powerful units from 300 watts with fans is possible with the correct calculation of the cross section of the cable. Power factor correction (PFC)* reduces power losses and inrush currents.

3 Choose the type of enclosure depending on where you use it

- ▶ Dry, dust-free room: power supplies encapsulated in metal case (mesh, IP20) or in plastic case (IP67, IP20).
- ▶ Wet room: waterproof units in metal or plastic housing.
- ▶ Outdoor: only waterproof power supplies encapsulated in metal housing (IP67).

4 Choose the appropriate voltage: 12 or 24 V

- ▶ The output voltage of the power supply must strictly correspond to the voltage of the LED strip (or other load).
- ▶ It is strictly forbidden to use 24 V power supplies for 12 V LED strip!

5 Calculate the power of a Power supply

$$\text{Power of 1 m LED strip (W)} \times \text{LED strip length (m)} + \text{Redundant power supply}$$

It is recommended to select a power supply with a power reserve in the range of 20–30%, depending on the operating conditions. A power reserve is necessary for the following reasons:

- ▶ The output power varies according to ambient conditions.
- ▶ The power supply overheats at maximum load.
- ▶ With sufficient power reserve, the service life is increased several times!

* **PF (Power Factor)** shows the ratio of useful (active) power to the total power of the device. Accordingly, the higher it is, the less reactive (garbage) power and the more efficiently the device uses the energy consumed.

PFC (Power Factor Correction): allows to compensate a considerable part of reactive power and increase PF to 0.90–0.98.

WATERPROOF CONSTANT VOLTAGE POWER SUPPLIES

FOR OUTDOOR LIGHTING

IP66-67

WATERPROOF METAL

- ▶ High efficiency, overload, short-circuit and overheat protection with auto-recovery.
- ▶ High stability of the output voltage.
- ▶ Models are available with DALI/0-10 V dimming standards and models with a start temperature of -55 °C (for operation in the Far North).

Application

- ▶ Power LED strips, linear and modules.
- ▶ Landscape, architectural and interior lighting.
- ▶ Advertising lighting (light boxes, signs, showcases).

PLASTIC HOUSING

- ▶ Reduced weight and compact size.
- ▶ Wide range of AC input voltage limit of 100-265 V.
- ▶ Overload, short-circuit and overheat protection.

"RADUGA" SHOPPING CENTER. ST. PETERSBURG

LED NEON

Flexible neon is a flexible PCB with bright LEDs, encapsulated in a soft PVC sheath that protects against UV rays and moisture, as well as against electric shock. The light-conductive shell distributes the glow evenly over the entire surface without dark gaps.

NEON

Flexible neon made of high-strength composite material that provides elasticity and resistance to low temperatures. Lateral bending. Outdoor advertising, advertising letters, signs. Decorative design of buildings, stairs, bridges.

LIGHTING DESIGN

NEON LED

Application

- ▶ Indoor lighting.
- ▶ Decorative floor and stair lighting.
- ▶ Advertising highlighting (showcases, lightboxes, text).

LED NEON

Flexible neon is a flexible PCB with bright LEDs, encapsulated in a soft PVC sheath that protects against UV rays and moisture, as well as against electric shock. The light-conductive shell distributes the glow evenly over the entire surface without dark gaps.

MOONLIGHT

Moonlight creates uniform, continuous "lines of light" without visible LED dots or dark spots.

The series is distinguished by its waterproof, high brightness and powerful luminous flux. Neon in classic white shades and RGB, RGBW, RGB-MIX.

Protection from UV radiation, moisture and other adverse effects enables the use of flexible neon 365 days a year under all weather conditions.

The combination of unique performance and lighting characteristics makes the flexible neon perfect for both outdoor and interior applications.

STANDARD LED MODULES

LED modules have a high degree of reliability and luminous efficiency. The catalog contains modules for various types of outdoor advertising. Front and side modules are designed to create signs, logos, and street signs.

DIP9

Locks on the housing allow you to tightly install the module in a hole with a diameter of 9 mm. Working temperature range from -35 to $+50$ °C. Outdoor advertising: colored signs, running lines, lightboxes, etc. Framed diffuser illumination, lighting mosaic images.

With lenses

A wide-angle light-scattering lens provides uniform highlighting. High efficiency of 150 lm/W. The current stabilizer provides the same level of brightness of the light. Outdoor advertising: colored signs, running lines, lightboxes, etc. Framed diffuser illumination, lighting mosaic images.

Side

The module lens creates a double $15/55^\circ$ angle of illumination, allowing you to evenly illuminate the lightbox on both sides. The current stabilizer provides the same level of brightness of the light. Suitable for outdoor advertising. Modules are installed in the interior of the box along the perimeter.

Without lenses

The housing is made of ABS plastic and aluminium PCB. Provides uniform highlighting. Outdoor advertising: creating luminous letters of different colors, in color signs, logos. Highlighting of lightboxes, stands. Framed diffuser illumination, decorative design showcases.

CONTROLLED MODULES

IP65-68

SPI modules

Any external SPI interface controller can be used for the control. SPI control protocol would be perfect for use by both experienced specialists and amateurs.

With the intuitive and user-friendly software, one can program a fairly wide range of multi-color light effects, from a simplest "running lights" effect to dynamic images playback on multimedia screens.

Most often, SPI modules are used for outdoor advertising and interior lighting.

DMX modules

Any external DMX interface controller can be used for the control.

DMX control protocol modules are more suited to professional users; however, they offer ample opportunities for implementing unusual lighting tasks.

The special-purpose software facilitates creating 3D lighting arrangements with dynamic effects of diverse complexity.

DMX modules are primarily used for light installations on buildings, advertising structures, light-and-music shows.

LIGHTING DESIGN CONTROLLED MODULES

SPI | DMX MODULES

These series modules are designed to create media façades, advertising structure design, and light decorations on building of any complexity in for the hospitality and entertainment industry, e.g., parks, clubs, restaurants, concert halls and various multimedia projects. The control is performed using DMX/SPI protocol controllers.

The modules have a high-degree environmental protection and can be operated under any weather conditions. The modules are equipped with holders. They can be fastened to any surfaces or structures, depending on different installation methods.
